REMARKS

In response to the Restriction Requirement, mailed on January 9, 2007, a complete listing of all of the claims is presented herewith. Applicants would like to elect Species II, Claims 9-13 and 14-19, drawn to a programmable Gamma circuit, wherein the controller of the programmable Gamma circuit is omitted, and programmable setup signals in digital form are provided externally via a control/modify circuit.

Given that upon the allowance of a generic claim, Applicants will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim provided by 37 CFR 1.141, Applicants would like to withdraw the rest of the claims, i.e. Claims 1-2 and 4-8, in the present application.

If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.
